Cooper Crouse-Hinds GmbH and the WEEE Directive

The Directive aims to minimise the impact of electrical and electronic goods on the environment, by increasing re-use and recycling and reducing the amount of WEEE going to landfill.

The EC directive on Waste Electrical and Electronic Equipment (WEEE) came into effect in Germany (**ElektroG**) on the 16th. March 2006.

In scope Cooper Crouse-Hinds GmbH products produced since 13th August 2005 have been marked with a crossed out wheelie bin underlined with a thick black line -

and one of the identification marks as illustrated below -

Cooper Crouse-Hinds GmbH is responsible for the treatment, disposal and wherever possible recycling of all products produced since that date

Cooper Crouse-Hinds GmbH has registered as a producer of Non Household WEEE, and will finance the cost of the collection, treatment, recovery and environmentally sound disposal of new and historic WEEE.

According to § 6 Abs. 2 ElektroG we are registered at the responsible „Stiftung Elektro-Altgeräte-Register (EAR)“ listed in Cat. 5 “Beleuchtungskörper“ with following registration No.:

WEEE-Reg.-Nr. DE 76272308

In compliance with the legislation Cooper Crouse-Hinds GmbH will also accept back for disposal on a like for like basis any Historic WEEE of any manufacture (Products produced before 13th August 2005, identified by the lack of the thick black line under the crossed out wheelie bin).

This applies where new Cooper Crouse-Hinds GmbH products have replaced the equivalent amount of historic WEEE products. If any Historic WEEE is to be returned this must be advised prior to our acceptance of the order and a method and period agreed for the return of this waste.

To arrange disposal of any products under this scheme the customer will need to complete a “product recycle request form” and obtain a “Goods Return Number” from our Customer Services Center on +49 6271 806 500 or by contacting: info-ex@ceag.de
