Freedom from asbestos in compliance with regulation 1999/77/EU

Dear customer,

CEAG has an obligation to preserve our intact environment. Our safety and environmental policy consists of complying with all relevant regional and European directives applying to our products and production processes. Customers often ask us about this in relation to the European directive specified below. With regard to the use of asbestos, here is the answer for products from our "Safety and Emergency Lighting" business sector.

Directive 1999/77/EU of the commission from 26. July 1999 for the sixth adaptation of Appendix I of directive 76/769/EEC of the commission for alignment of legislative and management regulations for limitation of the bringing to market and use of specific hazardous materials and preparations, specifically asbestos.

Asbestos or products containing asbestos are not used in the standard products of CEAG Notlichtsysteme GmbH.

Best regards,

Henning Flöttmann (GF)

i.A. Thorsten Möllmann (SIFA)
